Strategies for infection prevention, best practices, the changing budget landmines of healthcare-associated infections (HAIs) and emerging multidrug-resistant bacteria are among the topics that will be covered at the Association for Professionals in Infection Control and Epidemiology (APIC’s) Annual Educational Conference, November 6th in Las Vegas, NV. The meeting is the largest annual gathering of infection prevention and control professionals in Clark County.
The Chapter 35 APIC Chapter invites you to the annual conference, hosted by Brady Industries in Las Vegas, Nevada. APIC’s Annual Educational Conference is an educational opportunity for health care professionals in all settings who have infection control and prevention responsibilities. It is also a meeting place for novice and experienced ICP’s to expand their knowledge base, establish practical expertise in infection control and epidemiology and network with the IC experts and colleagues in Clark County.
